Profile

Computer Science Engineering graduate with hands-on experience in Adobe Experience Platform (AEP) and Customer Journey Analytics (CJA), along with knowledge of Real-Time Customer Data Platform (RTCDP). Interested in Martech, customer data and analytics, with experience working with XDM schemas, datasets, data ingestion, data mapping, identity, segmentation, Query Service, CJA Connections, Data Views, dimensions and metrics. Aspiring to build a career in Martech Business Analysis while developing strong technical expertise in Adobe Experience Cloud technologies.

Skills & Abilities

- **Adobe Experience Cloud:** Adobe Experience Platform (AEP), Customer Journey Analytics (CJA), XDM, Datasets, Data Ingestion, Identity, Segmentation, Data Views, Dimensions, Metrics
- **Data & Analytics:** MySQL, Customer Data Analysis, Audience Analysis, Customer Journey Analysis, Data Visualization
- **Technical:** C, Java, HTML, CSS, REST APIs, React, Spring boot
- **Generative AI:** RAG, Prompt Engineering
- **Tools:** VS Code, Postman, PowerBI

Technical Experience

Adobe Experience Platform (AEP) & Customer Journey Analytics (CJA) – Hands-on Experience

- Created and worked with XDM schemas, standard/custom field groups, custom fields and datasets, including data ingestion and mapping of CSV/Experience Event data.
- Worked with Identity Service and Profiles, including custom identity namespace and primary identity configuration.
- Created audiences using attribute/event-based rules and worked with sequential, multi-entity, aggregation, dynamic and composed audiences.
- Activated audiences to configured destinations, including Amazon S3.

Customer Journey Analytics (CJA) – Hands-on Experience

- Created Data Connections and Data Views using AEP data, with configuration of dimensions and metrics.
- Used CJA Workspace for analysis using freeform tables, attribution, filters, sorting and date/data-range controls.
- Created segments using AND/OR conditions, nested containers, include/exclude logic, and time/order restrictions.

Adobe Experience Cloud – Knowledge

- RTCDP: Knowledge of customer profiles, audiences, segmentation and activation concepts.
- AJO & Adobe Target: Knowledge of customer journeys, engagement, personalization and experience optimization.
- Data Governance: Knowledge of data usage labels, governance concepts and responsible use of customer data.

Education

B.E. – Computer Science & Engineering | Bengaluru | CGPA: 9.35

Additional Information

- **Certifications:** Artificial Intelligence Foundation, Data Visualization (Tata Forage), Generative AI.
- **Achievements:** Published the research paper *"Object Detection via Independent Dataset Training" in 2025* and "*Real-Time System for Translating Sign Language into Braille Through Text with Deep Learning*", Presented the project at the State level KSCST Project Exhibition.
- **Languages:** English, Kannada, Telugu.
