SAI ANANYA J

8277559785 sai-ananya.jana@capgemini.com LinkedIn GitHub

Profile

Software Engineer with hands-on experience in Java, Spring Boot, React, REST APIs and SQL, with training in Adobe Experience Platform (AEP) and Customer Journey Analytics (CJA). Skilled in XDM, data ingestion, datasets, identity, segmentation and data analytics, with a strong foundation in enterprise application development and debugging. Interested in exploring Adobe Experience Cloud applications and applying technical and analytical skills to data-driven business solutions.

Skills & Abilities

- **Adobe Experience Cloud:** Adobe Experience Platform (AEP), Customer Journey Analytics (CJA), XDM, Datasets, Data Ingestion, Identity, Segmentation, Data Views, Dimensions, Metrics
- **Programming:** C, Java, JavaScript
- **Backend:** Spring Boot, REST APIs, Hibernate, JPA
- **Frontend:** React, HTML, CSS
- **Databases:** MySQL
- **Tools & Concepts:** VSCode, Postman, OOP, Debugging, RAG, Prompt Engineering

Technical Experience

Adobe Experience Platform (AEP) & Customer Journey Analytics (CJA) – Hands-on Experience

- Gained hands-on experience with AEP schemas, XDM, datasets, data ingestion and identity management.
- Worked on data mapping, experience event datasets, segmentation and Query Service.
- Performed hands-on activities in CJA Connections, Data Views, dimensions, metrics and classifications.
- Created and analyzed segments and customer journey data using AEP and CJA.

Software Engineer Intern | Capgemini | On-site — Mar 2026 - May 2026

- **Technologies:** Java, Spring Boot, Angular, Hibernate, JavaScript
- **Project:** Developed a responsive e-commerce web application (DCX App Store) using Angular, implementing reusable UI components, routing, forms, and responsive layouts, while gaining hands-on experience with Spring Boot backend concepts, Hibernate ORM, and database integration.

Projects

GiftNest – AI-Powered E-Commerce Application — Aug 2026

React, Redux Toolkit, Java, Spring Boot, REST APIs, Hibernate/JPA, PostgreSQL

- Developed a full-stack e-commerce application with product browsing, cart, Wishlist, checkout, order management and role-based admin features.
- Built RESTful APIs using Spring Boot, Hibernate/JPA and PostgreSQL, with JWT-based authentication and authorization.
- Integrated AI-powered gift recommendations using customer preferences such as recipient, occasion, interests and budget, with catalog-based fallback recommendations.

Real-Time System for Translating Sign Language into Braille through Text — Sep 2025- Dec 2025

- Developed an assistive system that recognizes Indian Sign Language (ISL) gestures using MediaPipe, OpenCV, and SVM, translating them into text and Braille to facilitate accessible communication with accuracy 97.5%.

Education

B.E. – Computer Science & Engineering | Dayananda Sagar Academy of Technology and Management, Bengaluru
2022 – 2026 | CGPA: 9.35

Additional Information

- **Certifications:** Artificial Intelligence Foundation, Data Visualization (Tata Forage), Generative AI.
- **Achievements:** Published the research paper *"Object Detection via Independent Dataset Training" in 2025* and "*Real-Time System for Translating Sign Language into Braille Through Text with Deep Learning*", Presented the project at the State level KSCST Project Exhibition.
- **Languages:** English, Kannada, Telugu.
